

Your Smile Says It All

Alison O'Reilly talks to Darling about the dream of having her teeth fixed

"I hadn't been particularly happy with my teeth for some time. I had existing crowns and veneers, which were old, cracked and unflattering, but had been put off having further cosmetic dentistry due to the cost involved.

I decided to take action after I cracked the veneer on my front tooth and having passed Aura several times, I decided to pop in one evening. As I was offered a free consultation, I had nothing to lose. The first impression of this modern, black and white chrome environment with the colourful fish tank was fantastic. Dr Nadine Epp was extremely welcoming and informative and carefully explained the various options open to me and what she considered would be the best course of treatment. I was given a quote and went away to mull it over. There was no pressure on me to continue, but after discussing the option to pay by payment plan, I realised that it was cheaper than expected and I could afford to have treatment, so I quickly made the decision to proceed.

My treatment involved a series of veneers and crowns on my top front eight teeth – a smile makeover. I had various moulds, measurements and photos taken of my mouth to ensure the best possible results. While I was having the actual procedures done my hands were given a real pampering in hot wax. It was a beautiful, warm, tingling sensation - something I had never had before and definitely a bonus!

As soon as the temporary teeth were fitted, I knew I'd done the right thing – they looked fantastic. However, I was assured that the permanents would look even better. After 3 weeks I received a call to say that the permanents had arrived from the US lab and that they were ready to be inserted.

What can I say – I was amazed at the results. After only a few weeks I had a smile to be proud of. The entire experience was pain-free and I would recommend it to anyone. The only regret I have, was that I didn't do it sooner!"

A SMILE MAKEOVER AT AURA

Dr. Nadine Epp has undergone extensive cosmetic master level training in the US under expert cosmetic celebrity dentist Dr. Larry Rosenthal of New York.

How do you decide what is best for you?

1. If you are unhappy about the COLOUR of your teeth, you WHITEN them.
2. If they are CROOKED, you STRAIGHTEN them.
3. But... if you are unhappy about the SIZE/SHAPE and /or COLOUR/POSITION then you need an AURA SMILE MAKEOVER

A Smile Makeover can be carried out by using a combination of veneers, crowns, bridges and implants. You can choose white, "Hollywood smile" or a more natural classic smile. **FREE COSMETIC CONSULTATION**
